

**REMARKS**

A new terminal disclaimer is enclosed.

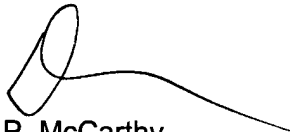

Independent claim 13 has been amended to include the limitation:

wherein said mounting location is oriented so that when a light emitting semiconductor device is mounted on it, the primary beam of light emitted directly forward by the light emitting semiconductor device forward will be emitted at an angle of from about 30 to about 150 degrees with respect to said elongate heat sink longitudinal axis.

This makes it clear that the light in question is not incidental light which may be emitted by the side of a chip, but the primary light emitted forward of the chip that establishes such angular orientation. The other pending claims are believed to be allowable.

The application is believed to be in condition for allowance. If any other fees are due, those fees should be charged to Deposit Account No. 50-0581.

Respectfully submitted this 14th day of March, 2005.
